

Graz, August 2008

Pre-announcement

Modelling – Analyses – Design - Drafting

SOFiSTiK

Buildings, Bridges, Foundations, Steel and Lightweight structures

Date: 23rd and 24th October 2008

Venue: Riga

SOFiSTiK in cooperation with **ABES** invites all users of the software as well as all structural engineers to join us for the first SOFiSTiK seminar/workshop in Riga.

Topics:

- **Projects being realised by SOFiSTiK**
- **Technical Background**
- **Appropriate FE modelling**
- **Details about analysis and design**
- **Pre-stressing in shell and beam elements**
- **Construction staging**
- **Time depending effects**
- **Steel and concrete design according to Eurocode**
- **Formwork and reinforcement drawings**

In a separate session experienced SOFiSTiK users will be available for technical discussion.

Details: Place of event, agenda, registration form, application fee etc. will follow in September 2008.
